

JOB DESCRIPTION

Industrial Engineer

Ref. J067/DC/C0105/2019

- Global aerospace company.
- Plan and optimise.
- Workshop process is your thing.

Our client is one of the largest global aerospace companies in the world. They have a facility in Hong Kong servicing the region's largest operators.

They are believer and adopt best in class across the business and they are looking for a high calibre individual to continually improve this facility and other service centres.

You will ensure the service centre capacity can match demand make changes in tooling or parts to drive the correct capacity and ensure all the metrics are green.

You will be proficient in LEAN and have a business mind to prepare and execute capital expenditure tools.

The facilities are technology leading, providing transparency and visibility to internal and external customers and you are responsible to keep the service centres with the automated tools.

You will identify, commission, and prepare the facility for new equipment, tooling and process entry to service, including documentation, SAP task list requirements and work with the teams to execute service readiness.

Tooling and equipment availability is critical to the operation and you will control the maintenance, calibration and asset management.

The site is leased and working with the management, you will be responsible for lease renewal a year in advance, with contingency for site relocation.

If you are an industrial or process engineer, who is an experienced project manager and team person topped with a business head, jump into the demanding world of aerospace engineering.

Interested candidates please send your CV to stepup@stepup.com.hk or visit the website <http://www.stepup.com.hk/opportunities.html> to submit your application. Candidates should submit their CVs with true, compete and accurate information.
