

## Job Description

**Ref: J045/DC/C0081/2018**

### Project Manager

- Premier FBO.
- Gateway to China and Asia.
- Upgrading and expanding.

Our client is a premier fixed based operator, at the gateway of Asia, China and beyond.

They provide a full range of technical, ground handling, passenger and crew services for that personalised travel experience.

They are seeking a project manager who will lead and deliver upgrading and expansion capability to their maintenance and ramp facilities.

The current facilities are reaching their maximum capability. The world has moved on rapidly and so has the technology, both bring added safety, productivity which delivers better customer experience. Our client wants to take their world class facility and make it ready for the future, at its home base and also in its expansion overseas.

You will be an experienced aircraft engineer who knows line and base aircraft handling and maintenance. You will apply this knowledge in delivering state of the art upgrades and capability to the existing and new facilities. You will be seasoned at delivering projects on time and to budget. Your ability to work well across the teams and external partners is unparalleled. You will enjoy presenting to management peers and external partners on your projects.

Look forward to the challenge and apply now.
